

PRESS RELEASE

IPmotion supplies German regional bus Leipzig with WiFi

- 145 buses equipped with WiFi
- Supplement to already installed LTE router
- WiFi-AP from the CAR-A-WAN v4 series were delivered

Heuchelheim, 05/02/2018 – IPmotion delivered smart WiFi access points for the 145 buses of Regionalbus Leipzig GmbH in December 2017 after a six-month test phase. LTE routers were already installed in the vehicles, which were supplemented by individually programmable WLAN systems based on the CAR-A-WAN 4 series. The overall solution, which has now been handed over to the public, offers a legally compliant, reliable and free of charge access to the Internet and traffic information via the easy. GO connection information service.

Publication free of charge, specimen copy requested, Pictures and other press material can be found under www.ipmotion.de/en/news/press-materials/

The IPmotion GmbH

Founded in 1999, IPmotion resides in the Hessian town of Heuchelheim since 2009. The company is the world's leading provider of high availability mobile routers. The deployment of fast and secure internet connections in all classes of vehicles (automotive, maritime and railway) is the company's main objective.

IPmotion's CAR-A-WAN router technology

The CAR-A-WAN router technology debuted in 2003 and has since been offering a stable and fast internet access point in commercial vehicles, trains, trams, buses and ships. Hardware and software have been continuously improved to fit customer needs and guarantee client satisfaction. The CAR-A-WAN router technology offers a multiple bandwidth in contrast to all other system solutions and can be enhanced with the installing of further applications and services.
